Playing guitar, running, cooking
and driving (drifting)

PROFILE

Aspiring developer with an entrepreneurial background and passion for design looking for a career change into the tech industry.

PROJECTS

Stock News

Collaboration

- Worked in a team of 3 developing a stock research application that fetches and presents real-time data from third-party APIs
- Designed a responsive front-end using PureCSS and JavaScript

Workout Tracker

Collaboration

- Developed the back-end for this app using MongoDB with a Mongoose schema and created the routes with Express allowing the user to log multiple exercises in a workout and track progress

Weather Dashboard

Individual

- Built an app that displays current and forecast conditions for any city and locally saves the user's search history for quick revisit
- Uses Axios to fetch data from OpenWeatherAPI and Bootstrap for the front-end design

Employee Management System

Individual

- Created a command line app that adds, removes, and updates employee data from MySQL using Node.js and Inquirer.js
